## Summary

---

I'm a disciplined and motivated B.Tech graduate in Computer Science Engineering with hands-on experience through academic projects and self-learning in web development, machine learning and data analysis. I enjoy solving real-world problems and learning new technologies. Eager to start my professional career, contribute to meaningful projects, and continuously develop my technical and professional skills in a dynamic work environment.

## Projects

---

### AI Powered Diagnosis & Disease Prediction System | *Python, Flask, Machine Learning, HTML, CSS, MySQL*

- Developed a multi-disease prediction system using Machine Learning algorithms. Added chatbot functionality to provide basic healthcare assistance and user guidance.
- Integrated trained ML models with Flask backend for real-time disease prediction.
- Performed data preprocessing, model training, and evaluation using Scikit-learn and Pandas. Generated prediction reports and visualized results for better user understanding.
- Integrated user authentication system with Admin and User dashboard functionalities.

### Resume vs Job Matcher | *Python, Streamlit, Scikit-learn, Pandas, NumPy, Matplotlib, NLP*

- Developed an AI-powered Resume vs Job Matcher system to analyze resume compatibility with job descriptions using Machine Learning and NLP techniques.
- Performed text preprocessing, feature extraction, and model evaluation using Scikit-learn and Pandas for accurate candidate screening.
- Added support for multiple PDF resume uploads with automated resume parsing and data extraction functionality.
- Visualized match analysis and candidate insights using interactive graphs and score representations for better recruiter understanding.

### Shop Online Java E-Commerce Management System | *Java, Java Swing, OOP, File Handling*

- Developed a Java-based e-commerce application using Object-Oriented Programming (OOP) concepts with separate customer and administrator functionalities.
- Implemented authentication, product browsing, shopping cart, order placement, and password management.
- Built admin inventory management with product details and stock updates.
- Used file handling for storing user and product data.

## Technical Skills

---

**Languages & Libraries:** Java, Python, C, HTML, CSS, NumPy, Pandas, scikit-learn, Matplotlib

**ML & Data:** Regression, Classification, KNN, Feature Engineering, EDA, Model Evaluation

**Tools & Deployment:** Git, GitHub, VS Code, Jupyter Notebook, SQL, Anaconda, Excel

**Core CS:** Data Structures and Algorithms, OOPs, DBMS, OS, Computer Networks

## Internships

---

### SHAPEMYSKILLS BY DUCAT :

- Completed comprehensive training in Machine Learning, gaining practical experience in EDA, data preprocessing, feature engineering, visualization, model development, and performance evaluation using Python, Pandas, NumPy, Matplotlib, and Scikit-learn.

## Certifications

---

### Embrizon Technologies:

- Completed comprehensive training in Core Java, covering object-oriented programming (OOP) concepts and application development fundamentals, with hands-on experience in Java programming, arrays, loops, functions, exception handling, and problem-solving techniques.

## Education

---

**Babu Banarasi Das Northern India Institute of Technology, Lucknow**

**Sept 2022 – June 2026**

*B.Tech. In Computer Science and Engineering*

**Central Board of Secondary Education**

**April 2020 – June 2021**

*Senior Secondary Education (Class XII)*

**Indian Certificate of Secondary Education**

**April 2018 – May 2019**

*Secondary Education (Class X)*
